

STRENGTHS

- All in One Conversational AI Platform**  
Provides an all-in-one in-house solution with proprietary speech recognition, TTS, NLU, orchestrator, and design studio—no reliance on external providers.
- In-House Biometrics Expertise**  
Advanced security and faster authentication with features like advanced voice-based security, emotion detection, and natural-sounding text-to-speech (TTS) technologies.
- Market-leading Speech Recognition**  
SESTEK delivers >97% accuracy and customizable solutions, including industry terms and advanced TTS.
- Built In-House, Consistent AI**  
Built and hosted in-house, our Virtual Agent ensures full control over data and delivers consistent, reliable responses that build user trust.
- Customizable Deployment Options**  
Supports cloud, hybrid, and full on-prem deployment—ideal for regulated environments, ensuring full control over infrastructure and data.
